Research University

HEREBY CONFERS THE DEGREE OF BACHELOR OF THE SCIENCE OF CREATIVE INTELLIGENCE UPON Norbert Jonas

This degree is awarded to those who have demonstrated their mastery of the Science of Creative Intelligence through successful completion of advanced programmes of study, research in consciousness, teaching, and applying this knowledge for the betterment of individual life and society.

The Science of Creative Intelligence connects the complete knowledge of Natural Law found in Maharishi's Vedic Science with the understanding of Natural Law from modern science; it applies this total knowledge of Natural Law through scientifically proven programmes for raising individual life and society to be spontaneously upheld by the invincible evolutionary power of Natural Law.

Maharishi has restored the thousands-of-years-old scattered Vedic Literature for the total significance of its theory and practice, and has organized it in the form of a complete science of consciousness—Maharishi's Vedic Science—whose Technologies of Consciousness are applied to benefit all areas of society. Maharishi's Vedic Science brings to light that the forty areas of Veda and the Vedic Literature are the total intelligence of Natural Law, lively within the transcendental field—the Unified Field of Natural Law—at the basis of every point of creation. As the totality of Natural Law, Rk Veda and the Vedic Literature are thus the Constitution of the Universe, the fundamental structures of Natural Law governing the vast diversity of the ever-expanding universe.

Under Maharishi's guidance, recent discoveries have shown the precise correspondence between the forty fundamental structures of Natural Law—the forty areas of Veda and the Vedic Literature—and the fundamental structures and functions of human physiology. These discoveries reveal that the same intelligence of Natural Law governing the activity of the universe is also governing human consciousness and physiology; the individual is really cosmic. This discovery of the

Norbert Jonas

inner intelligence at the basis of human physiology is a crowning achievement of the Science of Creative Intelligence.

The direct experience of the cosmic reality of individual life is available to everyone through Maharishi's Transcendental Meditation and TM-Sidhi Programme, including Yogic Flying. Through these simple and natural procedures individuals enliven the total intelligence of Natural Law in the simplest form of their own awareness, Transcendental Consciousness, and naturally begin to function from this level. As thinking and action become more in harmony with Natural Law, individuals gain support of Natural Law to accomplish their goals without strain.

More than 600 scientific research studies, conducted at over 200 universities and research institutes in 30 countries, validate the benefits of Maharishi's Transcendental Meditation and TM-Sidhi Programme for the development of mental potential, health, social behaviour, and the environment. Most significant for the nation as a whole is the *Maharishi Effect*, the finding that even the square root of 1% of the population practising the TM-Sidhi Yogic Flying Programme together in one place is sufficient to reduce negative trends and improve the quality of life in the whole society. With the establishment of large groups of Yogic Flyers, the *Maharishi Effect* will create an integrated national consciousness and bring life into harmony with Natural Law.

The recipient of this degree is qualified to give the knowledge of the total value of Natural Law in a practical way through teaching the Transcendental Meditation Programme. Through this programme all areas of society will be enriched—Education, Health, Business and Industry, Government, Economy, Defence, Law and Justice, Rehabilitation, Agriculture. The recipient of this degree is thus qualified to enliven the inner administrator of life—Natural Law—to be the invincible administrator of every aspect of society.

BMM

Dr. Bevan Morris, Chancellor, Maharishi European Research University, Seelisberg Switzerland
